

PROGRAM

CHAA.net Networking Seminar Series – 2005

“The NSW Government is undertaking the most significant reshaping of health administration since 1986. The reforms the Government is undertaking will create a more streamlined administrative structure that will unlock resources, which will be directed to frontline clinical services”

<http://www.health.nsw.gov.au/pubs/2004/planningbetterhealth.html>

Seminar 3: Asset Management Reform: Emerging Issues

Date: Wednesday 21st September 2005 5.30 – 8:00pm

Venue: Carlton Crest Hotel,
169-179 Thomas Street, Haymarket, Sydney

Learning Objectives and Outcomes

On completion of this seminar, attendees will have achieved the following learning objectives and outcomes:

1. An understanding of emerging issues in health facilities design from patient, technology & physical planning perspectives.
2. An appreciation of international trends in clinical care pathways and emerging technology that supports health service delivery.
3. An awareness of trends in appropriate physical design for facilities of the future.

References and Further Reading

A reading list will be compiled by the ACHSE Health Services Management Library and will be available following the seminar to attendees by visiting http://www.achse.org.au/library/lib_references.html

Presentations from this seminar will be available from the CHAA website at: www.fbe.unsw.edu.au/CHAA
Information regarding upcoming seminars is also available from this link.

Continuing Professional Development / Education

Where required by your professional institute to fulfil the requirements for CPD/E points, a self assessed learning form is available for this seminar.
