LIST OF REFERENCES: CHAA SEMINAR 23 August 2006 NSW Health System: Facilities Management and Sustainability

Allmark, Rebecca, **Due Diligence**, *HD Journal for Healthcare Design & Development*, Vol. 35(1) January 2004 pp. 34-36 ('Self-monitoring' of facilities management performance in PFI contracts is the norm, but who is checking that value for money is being provided to the public sector?)

Amaratunga, Dilanthi, and others, **Application of the Balanced Score-card Concept to Develop a Conceptual Framework to Measure Facilities Management Performance within NHS Facilities**, *International Journal of Health Care Quality Assurance*, Vol. 15 (4/5) 2002 pp. 141-151

Amaratunga, Dilanthi, **Assessment of Facilities Management Process Capability: A NHS Facilities Case Study**, *International Journal of Health Care Quality Assurance*, Vol. 16(6) 2002 pp. 277-288

American Institute of Architects, **The Use of Single Patient Rooms versus Multiple Occupancy Rooms in Acute Care Environments**, 2003
http://www.aia.org/aah_gd_hospcons

Applegath, Craig and Wigle, Jane, **Turning Green: Putting Sustainable Design Concepts into Practice in Health Care Construction Projects**, *Health Facilities Design*, Vol. 15(10) October 2002 pp. 22-24, 26-27

Berry, Leonard L and others, **The Business Case for Better Buildings**, *Frontiers of Health Services Management*, Vol. 21(1) Fall 2004 pp. 3- 24 (The one-time incremental costs of designing and building optimal facilities can be quickly repaid through operational savings, increased revenue and so result in substantial, measurable and sustainable financial benefits.)

Building Design and Construction **Progress Report on Sustainability**, CABA 2006
<http://www.caba.org/search/index.cfm?action=getfile&i=894&dc=IS>

Carthey, Jane, **Humanising the Hospital Environment**, *Hospital & Healthcare*, December

2005 / January 2006 pp. 18-20 (Discusses emerging trends and the need for healthcare facilities to be adaptable and to create a humanised environment.)

Dubbs, Dana, **'Green' Furnishings**, *Health Facilities Management*, Vol. 17(3) March 2004 pp. 26-29 (Environmentally friendly furniture for health care facilities.)

Forbes, Ian, **Designing for Health Outcomes**, *Hospital & Healthcare*, March 2004 pp. 18, 22-23 (Looks at the literature on the relationship between the built environment and health outcomes and asks why this is not routinely included in planning guidelines.)

Green Guide for Health Care, A Best Practices Guide for Healthy and Sustainable Building Design, Construction and Operations for the Healthcare Industry.

Lawson, Bryan and Wells-Thorpe, John, **The Effect of the Hospital Environment on the Patient Experience and Health Outcomes**, *HD Journal of Healthcare Design & Development*, Vol. 33(3) March 2002 pp. 27-32 (A major project comparing the effect of the environment on two sets of patients moving to new units.)

Long, Rachel, **Healing by Design**, *Health Facilities Management*, Vol. 14(11) November

2001 pp. 20-22 (Eight key considerations for building therapeutic environments.)

Material Health: An Assessment of the Environmental Sustainability of the NHS in England and Wales. (Data on the consumption of energy, materials and water, waste generated, and the use of transport in the NHS in England and Wales was used to map the flow of resources into, out of and within the NHS, and to calculate the ecological footprint of the staff, patients and visitors. This provided a baseline measure of the organisation's environmental impact.)
